Maintain **30%** Sales Growth For 11 Consecutive Years

SALVATIONDATA TECHNOLOGY

MILESTONES

2001

- Established the technical research team

2005

- Overseas business started

2008

- Released 2 key products: Data Compass & HD Doctor

2015

- Launched digital forensics products: DRS, SPF, VIP
- Established 5000M^2 information security incubation park in Neijiang

2016

- Established forensic science identification center collaborated with government

2017

- DRS, SPF, VIP have been listed in CFTT catalog program at NIST of U.S.A
- Awarded 1 Patent from USPTO

2018

- Globalization corporate development strategy
- Awarded 1 Patent from USPTO

2020 -2021

¥130 Million

- Fully enter into emerging business areas such as big data, data/cyber security, and AI.

Corporate Strategy

AI Application & Big Data

Established new company

Industry Control Systems Security

Collaborated with NPU

Forensic Identification Service

Collaborated with government

Cyber Security Solution

Strive For Excellence Motivated Forward

Pioneer of the Industry

China's leading integrated solutions provider of data security, digital forensics, and forensic data recovery.

- National High-Tech Enterprise
- Key New Product Development Unit of the National Ministry of Science and Technology
- National Development and Reform Commission Information Security Special Research Unit
- Key Cultivation Enterprise of Sichuan Information Security Industry
- Demonstration project of major scientific and technological achievements transformation project in Sichuan Province
- Sichuan Province Building an Innovative Model and Cultivating Sichuan Province May 1st Labor Medal
- Five-star judicial appraisal institution in Sichuan Province
- China's information security trustworthy brand
- Innovative development of advanced enterprises

Independent Intellectual Property Technological Products Continued Innovation

30%+

Sales Revenue Invest in R&D

30%+

R&D Funding Invest in Research

50%+

Employees Belong to R&D

Set up technology research institutes/centers in different directions in Chengdu, Xi'an and Neijiang.

The advanced R&D management system realizes the standardization and institutionalization of the whole process from project establishment, R&D, production to mass production.

Establish in-depth and all-round technical cooperation with multiple universities, alliances, and manufacturers such as the University of Electronic Science and Technology of China, Sichuan University, the Big Data Alliance, and the Alliance against Cybercrime.

Thousand pieces of invention patent applications, technical products conversion rate of 80%.

PARTICIPATING IN MAJOR CONFERENCES&EXHIBITION

- Forensics Europe Expo
- Techno Security & Digital Forensics Conference
- Russia Homeland Security Exhibition INTERPOLITEX
- Indian International Police Expo
- Global Local Seminar
- National Inspection Equipment Exhibition
- CCFC Computer Forensic Technology Summit
- China National Defense Information Equipment and Technology Exhibition
- Video Investigation and Video surveillance In-depth Application Seminar
- National Computer Forensics Technology Seminar
- Confidential Technical Exchange Meeting and Product Expo
- National Partner Conference
- China International Police Equipment Expo
- Criminal Investigation, Drug Control, Anti-Terrorism New Technology and New Product Application Exchange and Summit Forum
- National Digital Data Forensics Technology Training Classes
- Industry Training Conference

GLOBAL MARKET

Set up 12 branches and 6 subsidiaries, serving more than 10,000 customers from over 130 countries around the world

Nearly a Hundred Market Events

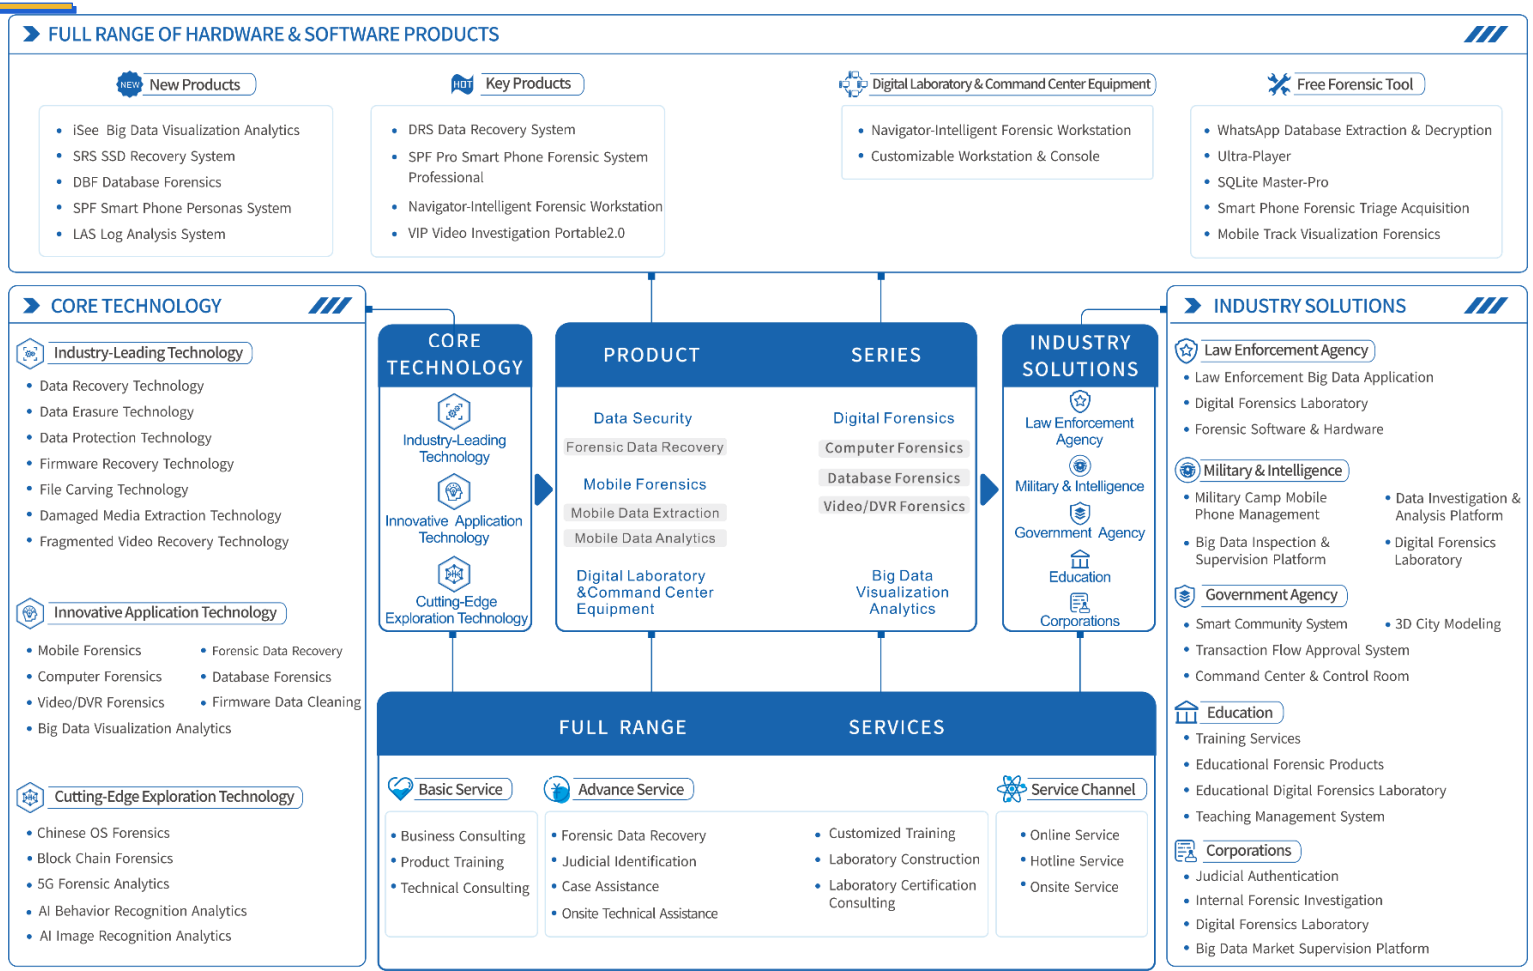
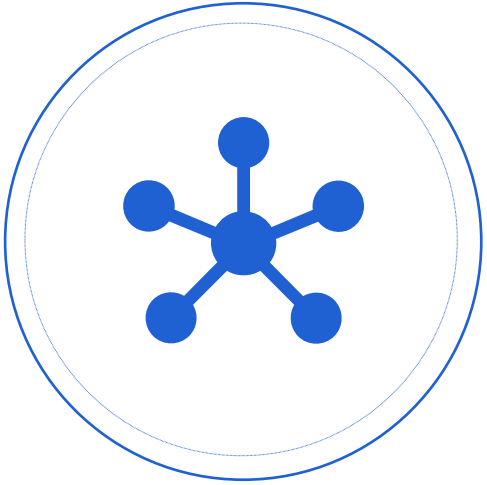
FOCUS ON PROVIDING HIGH ADDED-VALUE
TECHNICAL & ERGONOMIC SOLUTIONS

4+N ECO DEVELOPMENT OVERVIEW



KEY PRODUCT



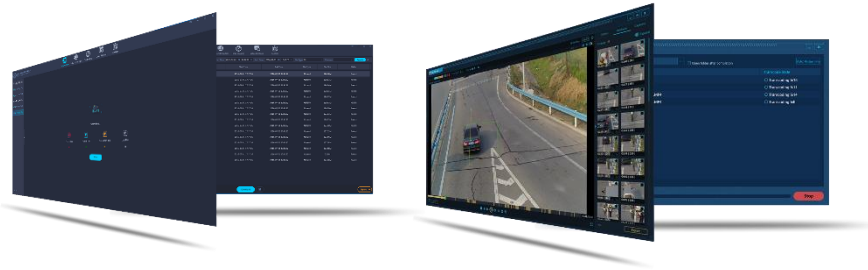
Video/DVR Forensics

VIP Video Investigation Portable 2.0

VIP (Video Investigation Portable) 2.0 promotes the efficient and effective extraction and recovery of digital media evidence for law enforcement and investigators by utilizing the forensically sound manner approach, audio and video evidence can quickly, easily and securely be recovered directly from CCTV DVRs, save you from the expensive and time-consuming process and give you a smarter video Investigation with lower cost.

Advantages

- Extraction
- Recovery
- Imaging
- Retrieval



Forensic Data recovery

DRS Data Recovery System

DRS (Data Recovery System) is the next generation intelligent all-in-one forensic data recovery tool that can help you acquire and recover data from both good and damaged storage media like HDD simply and easily.

Advantages

- Write Protection
- User Friendly
- All-in-one
- Acquire & Recover

Mobile Forensics

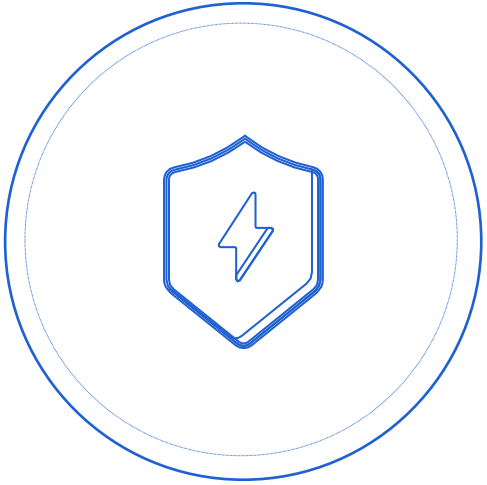
SPF Pro SmartPhone Forensic System Professional

SPF Pro (SmartPhone Forensic System Professional) is a forensically sound system for extracting, recovering, analyzing and triage data from mobile devices such as Android phones, tablets, iPhone & iPad.

Advantages

- Abundant Brands Support
- Intelligent Extraction & Analysis Solutions
- Physical Forensic Extraction
- Multi-Tasking

HARDWARE PRODUCT



Computer Forensics

DCK Data Copy King II

Data Copy King II (DCK II) is the second generation of SalvationDATA's well-received forensic data eraser and disk duplicator. Equipped with multi-function write-blockers, and embedded high capacity storage drive, DCK II is a fully portable device designed for both field and laboratory applications.

Advantages

- Data Eraser
- Write Protection
- Disk Clone
- Hash Calculation

Computer Forensics

Write Blocker -- High-Quality Forensic Bridge

SalvationDATA presents the latest accomplishment, the state-of-the-art forensic bridge (write-blocker) to meet the critical needs of the forensic community. Successful digital forensic investigations start by acquiring evidence from a wide array of modern and legacy storage devices.

Advantages

- Write Protection
- Abundant Interfaces
- High performance
- Virtual-Write

Intelligent Forensic Workstation

NAVIGATOR LH-DP990

Intelligent Forensic Workstation - NAVIGATOR LH-DP990 is an all-in-one new generation forensic extraction and analysis workstation developed by SalvationDATA, to help worldwide forensic examiners work smarter and faster that can solve every investigation. Our workstation is the most reliable and stable platform designed by Certified Forensic Examiners from SalvationDATA with decades of real-world forensic knowledge.

Advantages

- Highly Integrated Function Modules (Customization Available)
- One-stop Business Process Solution
- Multitasking
- Professional Hardware Structure

MANUFACTURING SOLUTION

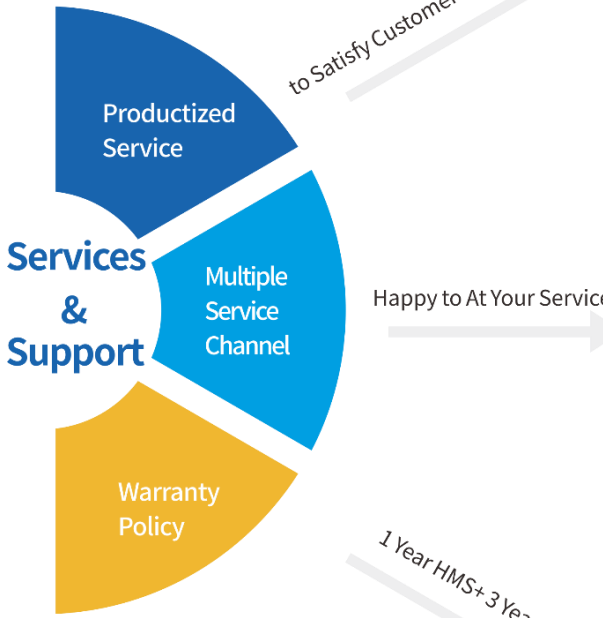
Service & Support

RAPID RESPONSE AT YOUR SERVICE

3+N SERVICES OVERVIEW

24*7 Services | 12 Service Centers | 100+ Tech Teams | Exclusive Services



to Satisfy Customer's Service Needs

Happy to At Your Service

1 Year HMS+ 3 Years SMS

Basic Service	Business Consulting	Product Training	Technical Consulting
Advanced Service	• Forensic Data Recovery • Onsite Technical Assistance • Laboratory Certification Consulting	• Judicial Identification • Customized Training	• Case Assistance • Laboratory Construction
Online Service	Email Official Social Media	Website Message SalvationDATA Blog	Remote Technical Service Webinar
Hotline Service	Telephone Number：+86-28-6873 1486		
Onsite Service	Seminar	Workshop	Training
1+3 Policy	We offer “one year HMS (Hardware Maintenance Service) and three years SMS (Software Maintenance Service)” for all our products.		

STC Professional Training System

Training Overview

SalvationDATA Training Center (STC), located in Chengdu, was established in 2011. Till now we have held hundreds of senior digital forensics and forensic data recovery pieces of trainings, expert lectures, and seminars which have helped thousands of trainees.

SalvationDATA has successfully delivered its certified digital forensic courses to numerous law enforcement, forensic investigators, and legal professionals as well as private corporations across all industry sectors.

Training Program

- Basic Forensic Data Recovery
- Elementary DVR Analyst
- Basic Mobile Forensics Investigator
- Expert(SFAE) Forensic Data Recovery and Acquisition Certification
- Expert(SFAC) DVR Forensics Analyst Certification
- Expert(SMFC) Mobile Forensics Investigator Certification
- Expert Forensics Data Recovery and Acquisition(SSD)
- Advanced RAID & Data Base Training

Training Facility & Cases

Warranty Policy

ONE YEAR HMS

THREE YEAR SMS

Customer proposes a warranty application with requirements, causes and faults description

Support team inspects the faults and confirm the valid warranty conditions of the case

If the case matches the warranty policy and faults are caused by malfunctioned hardware, it should be negotiated in time to be returned to us. Then it should be replaced with a new one or repaired

If the case matches the warranty policy and faults are caused by software interruptions, it should be negotiated in time to be solved by remote assistance or new software packages

If the case does not match the warranty policy, it should be negotiated in time to be solved by the customer with our suggestion
